

Johnny Dao

Woonsocket, RI | Jdao917@gmail.com | 510-289-2889

Cloud / Python Automation Engineer | Cloud Data & AI/ML Focus

PROFESSIONAL SUMMARY

- Cloud and automation engineer with 10+ years of IT experience across AWS, Azure, infrastructure automation, production support, and operational reporting.
- Build Python and PowerShell workflows that collect, validate, transform, and report cloud data across multi-account AWS environments.
- Day-to-day work includes partnering with research labs to design AWS infrastructure for AI, machine learning, and data-intensive workloads.
- Hands-on exposure to AWS AI/ML and GenAI services, with stronger familiarity in SageMaker AI and Bedrock through guided labs, basic deployments, model/endpoint concepts, and LLM/RAG workflows.

CORE SKILLS

Cloud: AWS, Azure, Terraform, CloudFormation, IAM, S3, Lambda, ECS, EC2, VPC, Docker, Kubernetes, Cost Explorer

Data & Automation: Python, PowerShell, SQL, Oracle, boto3, CSV reporting, data validation, data cleanup, data integrity checks

AI/ML & GenAI: SageMaker AI, Bedrock, Amazon Q, Comprehend, Kendra, Textract, LLM/RAG concepts, NLP concepts, AI-assisted development

DevOps & Systems: Azure DevOps, GitHub, Jenkins, JIRA, Git, CI/CD, Windows Server, Linux, Active Directory, Microsoft 365, Power BI

PROFESSIONAL EXPERIENCE

UMass Chan Medical School - Worcester, MA | Cloud Engineer | December 2022 - Present

- Build and maintain AWS cloud infrastructure using Terraform, CloudFormation, and AWS-native services.
- Partner with UMass Chan research labs to design and deploy 15+ AWS infrastructure environments supporting AI, machine learning, and data-intensive research workloads.
- Develop Python and PowerShell automation to collect, validate, transform, and report AWS resource data across multiple accounts.
- Created multi-account inventory and remediation workflows using Python, boto3, AWS SSO profiles, STS, and structured CSV reporting.
- Automated identification of CloudFormation stacks missing termination protection and SNS event notifications for audit remediation.
- Supported reporting for security findings, infrastructure compliance, resource inventory, cost anomalies, and remediation tracking.
- Gained hands-on exposure to SageMaker AI and Bedrock through guided labs, service walkthroughs, basic deployments, model/endpoint concepts, and LLM/RAG patterns.
- Partnered with research, medical, and IT teams to translate technical findings into remediation plans, summaries, and management updates.

PROFESSIONAL EXPERIENCE CONTINUED

Nelnet - Warwick, RI | Production Support Engineer | March 2016 - December 2022

- Supported production systems in a high-availability environment focused on monitoring, incident response, and operational reliability.
- Built PowerShell automation to reduce manual support tasks and improve consistency across operational workflows.
- Used SQL, application logs, and monitoring data to investigate issues, identify root causes, and support data-driven troubleshooting.

- Worked with Azure DevOps to support deployment tracking, release coordination, tickets, and technical documentation.

Goji - Boston, MA | Systems Administrator | June 2015 - March 2016

- Managed Windows systems, Microsoft 365, SharePoint, OneDrive, Power Apps, Power BI, and Exchange environments.
- Supported system security, endpoint management, network configuration, enterprise access, and reporting workflows.
- Worked with stakeholders to align technical solutions with business needs and improve operational efficiency.

Massachusetts Eye and Ear / Harvard - Boston, MA | Systems Analyst | April 2015 - June 2015

- Supported healthcare technology systems in clinical environments and helped improve operational workflows.
- Assisted with EPIC deployments while supporting healthcare compliance and patient data management requirements.

SELECTED CLOUD DATA & AUTOMATION PROJECTS

- AWS CloudFormation Audit Remediation: Built Python automation to scan AWS accounts, identify missing governance controls, and generate CSV reports for audit follow-up.
- AWS WorkSpaces Inventory & Health Reporting: Created reporting workflows to identify unhealthy or unused WorkSpaces and export findings for operational review.
- AWS Cost Anomaly Investigation: Analyzed cost alerts by reviewing account, region, service, usage type, S3 metrics, and root-cause details.
- Python Data Analysis Projects: Built scripts to process CSV datasets, apply scoring logic, analyze historical patterns, and generate ranked outputs.

EDUCATION & CERTIFICATIONS

San Jose State University - Bachelor of Science, Civil Engineering - 2011

Community College of Rhode Island - Certificate, Computer Programming & Networking - 2013

AWS Certified Solutions Architect - Associate (SAA-C03) - 2022

Anaplan Model Builder Level 1 - Completed 2024

Udemy - Python Full Stack Developer - Completed 2024

Udemy - Linux Administration: Beginner to Advanced - Completed 2022

AWS Certified DevOps Engineer - Professional - In Progress

AWS Certified Data Engineer - Associate - In Progress

Udemy - LLM Engineer / AI Developer - In Progress
